

TEMPCOD^o

The temperature-tracking patch offered by Mircod™ is valuable to couples who are looking to get pregnant. The app records a woman's basal body temperature (BBT or BTP) while sleeping, with no interruptions. The app will notify couples of peak times to conceive. In addition to real-time alerts, the app can keep detailed records concerning menstrual cycles (approaching, length).

Wireless Charging by:  Wireless Power Technologies

WE HELP YOU SENSE CHANGES IN REAL-TIME!

Created to sense both changes in body's position movement and temperature, TempCod™ is tiny, flexible and wirelessly charged. Digitized changes in temperature and motion detected by the sensors are automatically transferred using Bluetooth to mobile devices, while simultaneously being uploaded directly to Google, Amazon, Samsung, Azure or any private cloud storage solution. It is easy to use and operate. Available as White Label Technology.
